Amazonas Park, Neapoli

Located in northern Crete, Amazonas Park is a small, privately-funded animal park and rescue center focused on the conservation of endangered wildlife. In addition to domestic and local animals such as donkeys and goats, Amazonas Parks also features animals from South America, including parrots and monkeys.

During a visit to Amazonas Park, visitors can see colorful and exotic birds such as parrots, cockatoos, toucans, peacocks, and macaws. There are also butterflies, lizards, tortoises, goats, donkeys, lemurs, and monkeys. For many visitors, the highlight of their visit is the chance to feed the lemurs and monkeys inside their enclosures while under supervision.

Amazonas Park also runs a breeding program for birds, many of which get returned into the wild in Brazil and elsewhere.

The distance from Blue View Villas to Amazonas Park is 19.43 km or 12.08 miles.

Sitia Geopark, Sitia

The history of this land has been flowing for thousands of years alongside the history of its people.

And although the time of humans usually leaves gaps and unexplored points, the time of the land in Sitia has recorded its marks in every nook and cranny: on the rocks, in the ravines, in the caves and in its unique gorges.

The courses of humans and land here, in eastern Crete, intertwine and complement each other.

The marks of humans are revealed in the rich archaeological finds and in the present day, still unadulterated, life of its residents. The land is revealed in each of the hundreds of points of geological interest of the area.

The distance from Blue View Villas to Sitia Geopark is 70.87 km or 44.04 miles.
